

LIST OF PUBLICATION

Nickolai Lazarov Manev

Research papers

1. N. L. Manev, The Varshamov-Gilbert bound and GBCH codes. Comptes rendus de l'Academie bulgare des Sciences, 30(1977), no.8, pp. 1089-1092. MR 58 #20791
2. N. L. Manev, Extension of Varshamov-Gilbert bound for burst-correcting codes with fixed distance. Comptes rendus de l'Academie bulgare des Sciences, 31 (1978), no.3, pp. 277-280. MR 58 # 20792
3. N. L. Manev, Extension of Varshamov-Gilbert bound under arbitrary additive metric for burst-correcting codes. Comptes rendus de l'Academie bulgare des Sciences, 32 (1979), no.7, pp. 863-866. MR 81h #94022
4. S. Dodunekov, N.L. Manev, Characterization theorems for two classes of codes meeting the Griesmer bound. Comptes rendus de l'Academie bulgare des Sciences, 35 (1982), no.6, pp. 751-752. MR 84c #94009
5. S. Dodunekov, N. L. Manev, Характеризация двух классов кодов достигающих граница Грайсмера (A characterization of two classes of codes meeting the Griesmer bound), Problemy Peredachi informatsii, 19 (1983), no.4, pp. 3-10. MR 86h #94019.
6. S. Dodunekov, N. L. Manev, Минимально возможная блоковая длина линейного двоичного кода для некоторых расстояний (Minimal possible block length of a linear binary code for some minimum distances), Problemy Peredachi informatsii, 20 (1984), no.1, pp. 12-18. MR 86i #94048.
7. N.L. Manev, Граница на Грайсмер и оптимальни кодове. (Griesmer bound and optimal codes), Author abstract of the Ph.D. Thesis, 1984.
8. N.L. Manev, A characterization up to isomorphism of some classes of codes meeting the Griesmer bound. Proc. of the 6-th Intern. Symp. on Inform. Theory, Tashkent, 1984.
9. N.L. Manev, A characterization up to isomorphism of some classes of codes meeting the Griesmer bound. Comptes rendus de l'Academie bulgare des Sciences, 37 (1984), no.4, pp. 481-483. MR 85m #94029.
10. S. Dodunekov, N.L. Manev, An improvement of the Griesmer bound for small minimum distance. Discrete Applied Mathematics, 12 (1985), no.2, pp. 103-114. MR 86k #94030.

11. S. Dodunekov, N. L. Manev, An improvement of the Griesmer bound for some classes of distances. Intern.Symp. of IEEE on Inf. Theory, Brighton, 1985.
12. S. Dodunekov, N.L. Manev, Linear binary codes with minimum possible length, Proc. of the 10th Prague Conference on Inform. Theory, 1986.
13. . N.L. Manev, On the uniqueness of certain codes meeting the Griesmer bound. PLISKA Studia mathematica bulgarica, 8 (1986), pp. 47-53. MR 87m #94028.
14. N. L. Manev, Algorithm for solving quartic equations over, $GF(2^m)$, Proceedings of the International Symp. on Information Theory, October 6-9, 1986, Ann Arbor, USA.
15. S. Dodunekov, N.L. Manev, Some optimal binary codes with dimension 8; Proceed. of the Intern. Symp. on Inform. Theory, October 6-9, 1986, Ann Arbor, USA.
16. S.Dodunekov, N.L. Manev, The covering radius of optimal binary $[15,6,6]$ codes. Third International Workshop on Information Theory, Sochi, 1987, Proceedings.
17. S. Dodunekov, N. L. Manev, Уточнение границы Грайсмера для некоторых классов расстояний (An improvement of the Griesmer bound for some classes of distances) Problemy Peredachi informatsii, 23 (1987), no.1, pp. 47-56. MR 88f #94037.
18. S. Dodunekov, T. Helleseth, N.L. Manev, O. Ytrehus, New bounds on binary linear codes of dimension eight. IEEE Trans. on Inform. Theory, IT-33 (1987), no.6, pp. 917-919. MR 89f #94021.
19. S. Dodunekov, N.L. Manev, On the minimum distance of binary linear codes with the smallest possible covering radius. Annuaire de l'Universite de Sofia "Kliment Ohridski", 81 (1987), pp.
20. S. Dodunekov, N. L. Manev, Error-control coding for data communications. Journal of new generation computer systems, v.3, 1990, no.4, p.301.
21. B. Kostova, N. L. Manev, A $[25,8,10]$ does not exist. Comptes rendus de l'Academie bulgare des Sciences, 43 (1990), no.3, pp. 41-44.
22. E. Kolev, N.L. Manev, The binary weight distribution of an extended $[2^m, 5]$ Reed-Solomon code and its dual. Comptes rendus de l'Academie bulgare des Sciences, 43 (1990), no.9, pp. 14-19.
23. E. Kolev, N. L. Manev, The binary weight distribution of an extended $[2^m, 5]$ Reed-Solomon code and its dual. Proc. of II Intern. Workshop on Algebraic and Combinatorial Theory, 16-22 September 1990, Leningrad.

24. N. L. Manev, S. Topalova, Software system for testing Reed-Solomon codes in different channel, Proceedings of XXI Spring Conference of Union of Bulgarian Mathematicians, April 3-6, 1992.
25. E.Kolev, N.L.Manev, On the binary distribution of extended Reed-Solomon codes, Proc. of VI Joint Swedish-Russian International Workshop, August 22-27, 1993, Molle, Sweden.
26. Y. Borissov, N. L. Manev, Some remarks on Bossert-Mahr-Heilig scheme, Proceeding of IV Int. Workshop on Algebraic and Combinatorial Theory, September 11-17, 1994, Novgorod, pp.44-48.
27. S. Ilieva, N.L.Manev, Error-correcting pairs for binary cyclic codes of length 63 and 65, Proceeding of IV Int. Workshop on Algebraic and Combinatorial Theory, September 11-17, 1994, Novgorod, pp.102-106.
28. E.Kolev, N.L.Manev, The binary weight distribution of concatenated codes based on Reed-Solomon codes, Proceeding of IV Int. Workshop on Algebraic and Combinatorial Theory, September 11-17, 1994, Novgorod, pp.116-121.
